To: Executive Board

Subject: **Southern California Edison Transmission Relocation – Industry
Park& Ride Project**

Recommendation

Authorize the Executive Director to engage the services of Southern California Edison (SCE) to relocate two existing transmission poles and related transmission switchgear in the amount of one hundred twenty thousand dollars (\$120,000).

Analysis

The design of the Park & Ride structure at the Industry Metrolink station includes the widening of the northwest roadway entrance to the Industry Metrolink Parking lot to accommodate a dedicated vehicle entryway into the parking structure and busway into designated bus stops adjacent to the parking structure.

In order to accommodate the widening of the roadway, two existing SCE power poles and related pole mounted switchgear must be relocated away from the proposed roadway widening. Relocating the power poles can only be performed by SCE engineers, technicians, and work crews.

SCE has presented Foothill Transit with a cost estimate (**Attachment A**) of one hundred twenty thousand dollars (\$120,000) for engineering and relocation services of two existing power poles. The construction schedule of the parking structure calls for roadway improvements to begin on April 1, 2013. As such, the poles have to be relocated no later than end of March 2013. While this work was anticipated at the initiation of the project, the timing and cost estimate were dependent on SCE's engineers.

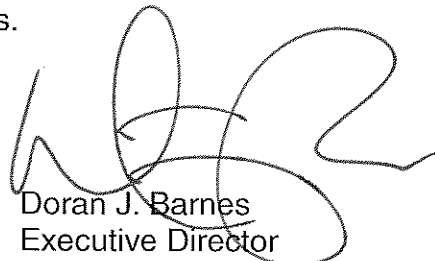

Budget Impact

The project budget in Foothill Transit's approved Fiscal Year 2013 Business Plan includes sufficient funds to pay for the above services.

Sincerely,

Roland M. Cordero
Director of Facilities

Subject: Transmission Relocation to Accommodate Parking Structure and Drive Aisle Construction
Foothill Transit Parking Facility, 600 S Brea Canyon Ave, City of Industry
Project ID #165

Mr. Roland Cordero:

Southern California Edison (SCE) has received a request from Foothill Transit to provide a cost estimate to relocate existing overhead Transmission facilities located at the Foothill Transit Parking facility, 600 S Brea Canyon Ave, City of Industry. In order to accommodate your request, SCE's Transmission facilities will be modified per the following scope:

- Relocate existing Transmission wood poles 4415461E and 4415462E and associated guy wires north to clear Foothill transit parking and driveway improvements.
- Relocate pole mounted transmission switchgear.
- Refer to attached plan Job No MP 12-12 #15 for detailed illustration of relocation.

The estimated cost to relocate these facilities to accommodate the development of your project is one hundred twenty thousand dollars (\$120,000.00). SCE acknowledges receipt of twenty thousand dollars (\$20,000.00) in engineering advance payments. Therefore, the balance due for completion of the project is one hundred thousand dollars (\$100,000.00), which includes 22% Income Tax Component of Contribution (ITCC).

Please issue your check payable to SCE and forward to my attention at the address shown below. Please ensure that the check identifies our Project ID #165.

All prices are applicable for 90 days from receipt of this letter. Please acknowledge approval of the proposed relocation scope by signing and returning a copy of this letter.

800 W Cienega Blvd.
San Dimas, CA 91773
951-288-6343
miquel.flores@sce.com

Upon receipt of all funds, signed copy of this letter, any required easements this project will be released for construction.

At the completion of the project, Foothill Transit will be provided a final invoice and billed or refunded any difference covering the actual cost of the project

If there are any delays or this project is canceled, please notify me immediately at (951) 288-6343.

Sincerely,

Miguel Flores
Project Manager
Transmission Project Delivery
Project Management

I acknowledge and agree to the above referenced SCE billing process and approval of SCE's proposed plan of relocation as a duly authorized representative of FOOTHILL TRANSIT
